Energy performance certificate (EPC)		
185, Ethel Road LEICESTER LE5 4WA	Energy rating	Valid until: 2 December 2029 Certificate number: 8891-7022-6429-3852-5906
Property type		Detached bungalow
Total floor area		66 square metres

Rules on letting this property

You may not be able to let this property

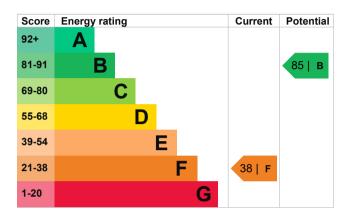

This property has an energy rating of F. It cannot be let, unless an exemption has been registered. You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-<u>guidance)</u>.

Properties can be rented if they have an energy rating from A to E. The recommendations section sets out changes you can make to improve the property's rating.

Energy efficiency rating for this property

This property's current energy rating is F. It has the potential to be B.

<u>See how to improve this property's energy</u> performance.

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

Feature	Description	Rating
Wall	Solid brick, as built, no insulation (assumed)	Very poor
Wall	Cavity wall, as built, no insulation (assumed)	Poor
Roof	Pitched, 150 mm loft insulation	Good
Roof	Flat, limited insulation (assumed)	Very poor
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, no room thermostat	Very poor
Hot water	From main system, no cylinder thermostat	Average
Lighting	Low energy lighting in 33% of fixed outlets	Average
Floor	Suspended, no insulation (assumed)	N/A
Secondary heating	None	N/A

Primary energy use

The primary energy use for this property per year is 552 kilowatt hours per square metre (kWh/m2).

Additional information

Additional information about this property:

Cavity fill is recommended

Environmental impact of this property		This property produces	6.4 tonnes of CO2
This property's current environmental impact rating is F. It has the potential to be B.		This property's potential production	1.3 tonnes of CO2
Properties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce.		By making the <u>recommended changes</u> , you could reduce this property's CO2 emissions by 5.1 tonnes per year. This will help to protect the environment.	
Properties with an A rating proc	duce less CO2	environment.	
than G rated properties. An average household	6 tonnes of CO2	Environmental impact rating assumptions about average energy use. They may not r	e occupancy and effect how energy is
produces		consumed by the people living at the property.	

Improve this property's energy performance

By following our step by step recommendations you could reduce this property's energy use and potentially save money.

Carrying out these changes in order will improve the property's energy rating and score from F (38) to B (85).

Step	Typical installation cost	Typical yearly saving
1. Flat roof or sloping ceiling insulation	£850 - £1,500	£24
2. Cavity wall insulation	£500 - £1,500	£33
3. Internal or external wall insulation	£4,000 - £14,000	£239
4. Floor insulation (suspended floor)	£800 - £1,200	£112
5. Increase hot water cylinder insulation	£15 - £30	£54
6. Low energy lighting	£30	£30
7. Hot water cylinder thermostat	£200 - £400	£27
8. Heating controls (room thermostat and TRVs)	£350 - £450	£103
9. Condensing boiler	£2,200 - £3,000	£111
10. Solar water heating	£4,000 - £6,000	£40
11. Solar photovoltaic panels	£3,500 - £5,500	£306

Paying for energy improvements

Estimated energy use and potential savings

Estimated yearly energy cost for this property	£1312
Potential saving	£773

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

The potential saving shows how much money you could save if you <u>complete each</u> recommended step in order.

For advice on how to reduce your energy bills visit <u>Simple Energy Advice</u> (<u>https://www.simpleenergyadvice.org.uk/</u>).

Heating use in this property

Heating a property usually makes up the majority of energy costs.

Estimated energy used to heat this property

Type of heating	Estimated energy used
Space heating	13957 kWh per year
Water heating	4721 kWh per year
Potential energy insulation	savings by installing
Type of insulation	Amount of energy saved
Loft insulation	333 kWh per year
Cavity wall insulation	565 kWh per year
Solid wall insulation	4125 kWh per year

Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
