Total floor area	102 square metres	

#### Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions.

Rules on letting this property

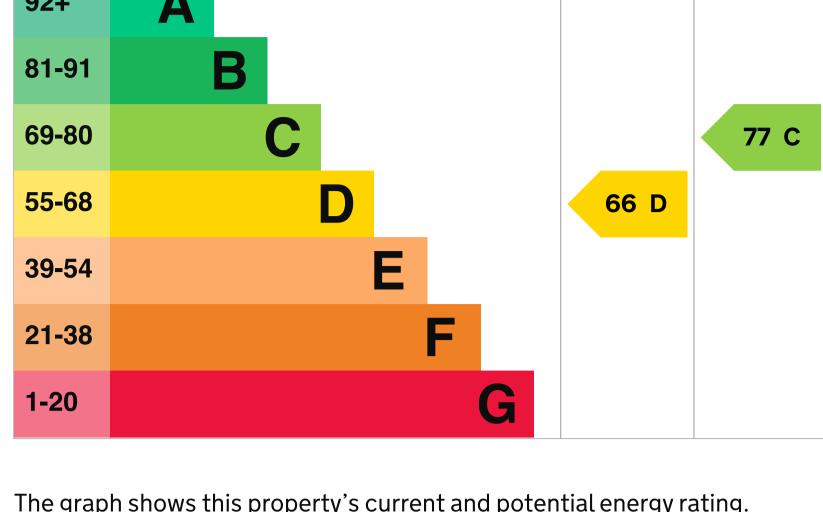

### This property's current energy rating is D. It has the potential to be C.

**Energy rating and score** 

See how to improve this property's energy efficiency.

**Potential** 

Score | Energy rating Current

For properties in England and Wales: • the average energy rating is D

#### performance **Features in this property**

#### efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Features get a rating from very good to very poor, based on how energy

Cavity wall, filled cavity Average

Wall	Cavity wall, as built, insulated (assumed)	Good
Roof	Pitched, no insulation (assumed)	Very poor
Roof	Flat, insulated (assumed)	Good
Window	Fully double glazed	Average
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system	Good
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Solid, no insulation (assumed)	N/A
Floor	Solid, insulated (assumed)	N/A
Secondary heating	None	N/A

About primary energy use

How this affects your energy bills

An average household would need to spend £2,161 per year on heating, hot

#### You could **save £170 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is: • 15,140 kWh per year for heating

#### Saving energy by installing insulation Energy you could save:

• 4,355 kWh per year from loft insulation

• 1,995 kWh per year for hot water

Find ways to save energy in your home.

#### **Environmental impact of this property** This property's current environmental impact rating is D. It has the potential

dioxide (CO2) they produce each year. CO2 harms the environment. **Carbon emissions** 

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment. These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of

Do I need to follow these steps in order?
