## Important Notice:

This report has been prepared for the purposes and use of the person named on the report. In order to ensure that you have sight of a current and up to date copy of the Home Report it is **essential** that you log onto [www.onesurvey.org](http://www.onesurvey.org) (free of charge) to download a copy personalised in your own name. This enables both Onesurvey and the Surveyor to verify that you have indeed had sight of the appropriate copy of the Home Report prior to your purchasing decision. This personalised report can then be presented to your legal and financial advisers to aid in the completion of your transaction. **Failure to obtain a personalised copy may prevent the surveyor having any legal liability to you as they will be unable to determine that you have relied on this report prior to making an offer to purchase.**

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes.

# **SINGLE SURVEY TERMS AND CONDITIONS (WITH MVR)**

## **PART 1 - GENERAL**

### **1.1 THE SURVEYORS**

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property.<sup>1</sup>

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

### **1.2 THE REPORT**

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

---

<sup>1</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

### **1.3 LIABILITY**

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

#### **1.4 GENERIC MORTGAGE VALUATION REPORT**

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

#### **1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES**

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

#### **1.6 INTELLECTUAL PROPERTY**

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

#### **1.7 PAYMENT**

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

#### **1.8 CANCELLATION**

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

## **1.9 PRECEDENCE**

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

## **1.10 DEFINITIONS**

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is *The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion*
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

---

<sup>2</sup> Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

## **PART 2 – DESCRIPTION OF THE REPORT**

### **2.1 THE SERVICE**

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

### **2.2 THE INSPECTION**

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

### **2.3 THE REPORT**

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

2.3.1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.

2.3.2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.

2.3.3 Category 1: No immediate action or repair is needed.

**WARNING:** If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

## 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

## 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

## 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

## 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

*"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an*

*arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion.* In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- \*There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- \*There are no particularly troublesome or unusual legal restrictions;
- \*There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

*“Re-instatement cost” is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form* unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

## 1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

|                                       |  |
|---------------------------------------|--|
| <b>Description</b>                    | Detached Bungalow.   |
| <b>Accommodation</b>                  | Entrance Hallway, Lounge, Kitchen, 3 Bedrooms, Bathroom, Porch and Store (no access).  |
| <b>Gross internal floor area (m2)</b> | Approx 86 m2.  |
| <b>Neighbourhood and location</b>     | The property is situated in rural surroundings approximately 3.5 miles from Tomintoul where limited local facilities are available and some 22.5 miles from Aberlour where Secondary Schooling is available. Grantown on Spey is approximately 14 miles distant.                               |
| <b>Age</b>                            | 65 years.  |
| <b>Weather</b>                        | Dry and bright following a period of cold and snow. The report should be read in context of these weather conditions.  |
| <b>Chimney stacks</b>                 | There are two rendered stacks with lead flashings.<br><br>Visually inspected with the aid of binoculars where required.  |
| <b>Roofing including roof space</b>   | The roof is of pitched, hipped design, timber framed and clad with concrete tiles.<br><br>A partial inspection of the roof space was possible where flooring has been laid. Insulation has been installed at ceiling joist level.<br><br>Sloping roofs were visually inspected with the aid of |

|  |  |
|--|--|
|  | <p>binoculars where required.</p> <p>Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.</p> |
| <b>Rainwater fittings</b>                  | <p>upvc and cast iron manufacture.</p> <p>Visually inspected with the aid of binoculars where required.</p>  |
| <b>Main walls</b>                          | <p>The walls would appear to be of block cavity construction, rendered externally and incorporating sub-floor ventilation.</p> <p>Visually inspected with the aid of binoculars where required. Foundations and concealed parts were not exposed or inspected.</p>   |
| <b>Windows, external doors and joinery</b> | <p>The windows and doors are of uPVC double glazed design. Fascias are formed in softwood.</p> <p>Internal and external doors were opened and closed where keys were available.</p> <p>Random windows were opened and closed where possible.</p> <p>Doors and windows were not forced open.</p>  |
| <b>External decorations</b>                | <p>External woodwork has been painted.</p> <p>Visually inspected.</p>  |
| <b>Conservatories / porches</b>            | <p>Rendered block built Porch with uPVC double glazing and a mono-pitched roof clad with Decra metal tile lookalike sheeting. Integral to the Porch addition is a Store with single leaf timber walls, rendered externally under the same roof. The door to this Store was locked and no internal access was possible.</p> <p>Visually inspected.</p>        |
| <b>Communal areas</b>                      | <p>None.</p>   |
| <b>Garages and permanent outbuildings</b>  | <p>There is a timber/plywood Shed with felt roof. Power and light are connected to this Shed. There are other outbuildings which are not classed as permanent for the purposes of this report.</p>   |

|  |  |
|--|--|
|  | Visually inspected.  |
| <b>Outside areas and boundaries</b>          | <p>There are garden grounds to the front, rear and side with boundaries formed in a mixture of fencing. Off-street parking is available.</p> <p>Visually inspected.</p>  |
| <b>Ceilings</b>                              | <p>Plasterboard lined.</p> <p>Visually inspected from floor level.</p>   |
| <b>Internal walls</b>                        | <p>Plasterboard lined.</p> <p>Visually inspected from floor level.</p> <p>Using a moisture meter, walls were randomly tested for dampness where considered appropriate.</p>  |
| <b>Floors including sub floors</b>           | <p>Timber design in the main structure and concrete in the Porch.</p> <p>My inspection of the flooring was restricted due to fitted floor coverings and there was no inspection possible of the sub-floor area.</p> <p>Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.</p>                          |
| <b>Internal joinery and kitchen fittings</b> | <p>Skirtings/architraves are formed in softwood. Internal doors are of hardwood single glazed or flush hollow panel design. The Kitchen comprises a range of units including a solid fuel Range.</p> <p>Built-in cupboards were looked into but no stored items were moved.</p> <p>Kitchen units were visually inspected excluding appliances.</p> |
| <b>Chimney breasts and fireplaces</b>        | <p>There is a multi-fuel stove at the Lounge fireplace with its own chimney breast. The Range in the Kitchen is flued via a secondary chimney breast.</p> <p>Visually inspected. No testing of the flues or fittings was carried out.</p>  |
| <b>Internal decorations</b>                  | <p>Walls and ceilings have been papered or painted. Several of the ceilings have polystyrene tiles fitted. Internal joinery has generally been stained.</p>  |

|  |   |
|--|---|
|  | Visually inspected.   |
| <b>Cellars</b>                               | None.   |
| <b>Electricity</b>                           | <p>Mains supply.</p> <p>Distribution wiring, where seen, is formed in PVC sheathed cable with the power points being of the modern square pin 13 amp type.</p> <p>Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.</p> |
| <b>Gas</b>                                   | None.   |
| <b>Water, plumbing and bathroom fittings</b> | <p>Private supply.</p> <p>Distribution pipework, where seen, is formed in copper together with uPVC soil and waste pipes.</p> <p>Sanitary fittings are modern in design.</p> <p>Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.</p> <p>No tests whatsoever were carried out to the system or appliances.</p>   |
| <b>Heating and hot water</b>                 | <p>Space heating is provided by a series of electric storage and panel heaters along with the stove in the Lounge. Hot water is provided by an immersion fitted to the hot water cylinder located in the Kitchen cupboard.</p> <p>Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.</p> <p>No tests whatsoever were carried out to the system or appliances.</p>  |
| <b>Drainage</b>                              | <p>Drainage is assumed to be water borne to a septic tank, the location of which is unknown.</p> <p>Drainage covers etc were not lifted.</p> <p>Neither drains nor drainage systems were tested.</p>  |

|  |  |
|--|--|
| <b>Fire, smoke and burglar alarms</b>      | <p>Smoke and heat detectors have been installed.</p> <p>Visually inspected.</p> <p>No tests whatsoever were carried out to the system or appliances.</p>   |
| <b>Any additional limits to inspection</b> | <p>Grounds were covered in snow as were parts of the roof coverings.</p> <p>There were floor coverings throughout which restricted the inspection of the flooring.</p> <p>We have not inspected the woodwork or other parts of the structure which were covered, unexposed or inaccessible and are, therefore, unable to report that such parts of the property are free from rot, beetle or other such defects.</p> <p>No investigation of any contamination on, under or within the property has been made as we consider such matters to be outwith the scope of this report. All property built prior to the year 2000 may contain asbestos in one or more of its components or fittings. It is impossible to identify without a test. It is beyond the scope of this inspection to test for asbestos and future occupants should be advised that if they have any concerns, then they should ask for a specialist to undertake appropriate tests. Asbestos is not harmful unless fibres are released into the air.</p> <p>Random testing for dampness was undertaken internally with the use of a moisture meter to walls, ceilings and flooring where considered appropriate.</p> <p>The services, electrical circuits, plumbing installation, heating and drainage systems have not been specifically tested.</p> <p>We do not carry out an inspection for Japanese Knotweed, which is a plant which is subject to control regulation, is considered to be invasive and one which can render a property unsuitable for some mortgage lenders. We have assumed that there is no Japanese Knotweed within the boundaries of the property or in neighbouring properties. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists, removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive.</p> |

## Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

## 2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the following 3 categories:

| Category 3   | Category 2  | Category 1                               |
|--|---|--|
| Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now. | Repairs or replacement requiring future attention, but estimates are still advised. | No immediate action or repair is needed. |

| Structural movement |  |
|---------------------|--|
| Repair category:    | 1  |
| Notes:              | There is evidence of cracking to the external render which is not unusual in properties of this age and type. Within the limitations of my inspection, the structural integrity of the building does not appear to have been significantly impaired. |

| Dampness, rot and infestation |  |
|-------------------------------|--|
| Repair category:              | 3  |
| Notes:                        | <p>There is evidence of water ingress in the vicinity of both the chimney stacks and the stacks and flashings require repair/replacement.</p> <p>Damp stains were noted to the sarking throughout the roof space, although the majority would appear to be historic.</p> <p>Dampness was recorded in wall linings throughout the property and is likely to be due to condensation. The advice of a Timber Specialist is recommended.</p> <p>Evidence of woodworm was noted to roof timbers and a Timber Specialist will require to undertake treatments.</p> |

| Chimney stacks   |   |
|------------------|---|
| Repair category: | 3 |

| Category 3   | Category 2  | Category 1                               |
|--|---|--|
| Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now. | Repairs or replacement requiring future attention, but estimates are still advised. | No immediate action or repair is needed. |

|        |   |
|--------|---|
| Notes: | Defective render and flashings are suspected to be the cause of the water ingress. There is a concern that the rear flue, utilised by the Range in the Kitchen, is defective and unsafe to use due to the condition of the blockwork in the roof space. It may be necessary to remove this stack in its entirety. |
|--------|---|

| Roofing including roof space |  |
|------------------------------|--|
| Repair category:             | 2  |
| Notes:                       | <p>Moss growth and weathered roof tiles were noted.</p> <p>Concrete tiles are typically guaranteed for 30 years but have a reasonable life expectation around 50/60 years according to the BRE. Life expectancy will often depend on weathering and damage from the prevailing weather. A roofing contractor will be able to advise on life expectancy and repair/replacement costs.</p> <p>Internally, woodworm was noted and will require to be treated.</p> |

| Rainwater fittings |                                    |
|--------------------|------------------------------------|
| Repair category:   | 1                                  |
| Notes:             | No significant defects were noted. |

| Main walls       |                                    |
|------------------|------------------------------------|
| Repair category: | 1                                  |
| Notes:           | No significant defects were noted. |

| Category 3   | Category 2  | Category 1                               |
|--|---|--|
| Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now. | Repairs or replacement requiring future attention, but estimates are still advised. | No immediate action or repair is needed. |

| Windows, external doors and joinery |  |
|-------------------------------------|--|
| Repair category:                    | 1  |
| Notes:                              | <p>No significant defects were noted.</p> <p>Replacement/double glazed windows can be problematic and over time the operation of the windows can be affected and opening mechanisms damaged. It is therefore likely that maintenance repairs will be required as part of an on-going maintenance programme. Our valuation does assume that the installation of the windows does comply with the necessary regulations at the time of installation.</p> |

| External decorations |                                    |
|----------------------|------------------------------------|
| Repair category:     | 1                                  |
| Notes:               | No significant defects were noted. |

| Conservatories / porches |                                    |
|--------------------------|------------------------------------|
| Repair category:         | 1                                  |
| Notes:                   | No significant defects were noted. |

| Communal areas   |                 |
|------------------|-----------------|
| Repair category: |                 |
| Notes:           | Not applicable. |

| Category 3   | Category 2  | Category 1                               |
|--|---|--|
| Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now. | Repairs or replacement requiring future attention, but estimates are still advised. | No immediate action or repair is needed. |

| Garages and permanent outbuildings |                                    |
|------------------------------------|------------------------------------|
| Repair category:                   | 1                                  |
| Notes:                             | No significant defects were noted. |

| Outside areas and boundaries |  |
|------------------------------|--|
| Repair category:             | 1  |
| Notes:                       | There are several trees growing in close proximity to the property. These will require to be regularly inspected to ensure they cause no damage. |

| Ceilings         |   |
|------------------|---|
| Repair category: | 1   |
| Notes:           | Damp stains noted to ceiling linings in the Kitchen cupboard beside the chimney breast. |

| Internal walls   |  |
|------------------|--|
| Repair category: | 3  |
| Notes:           | Dampness recorded in wall linings throughout and evidence of mould noted (see dampness section). |

| Floors including sub-floors |  |
|-----------------------------|--|
| Repair category:            |  |

| Category 3   | Category 2  | Category 1                               |
|--|---|--|
| Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now. | Repairs or replacement requiring future attention, but estimates are still advised. | No immediate action or repair is needed. |

|        |   |
|--------|---|
|        |    |
| Notes: | Dampness was recorded in floor timbers and conditions conducive to timber decay exist for the sub-floor timbers (see dampness section). |

| Internal joinery and kitchen fittings |  |
|---------------------------------------|--|
| Repair category:                      |  |
| Notes:                                | No significant defects were noted.   |

| Chimney breasts and fireplaces |  |
|--------------------------------|--|
| Repair category:               |   |
| Notes:                         | There is considered to be a safety issue with the rear flue utilised by the Kitchen Range. This requires to be inspected and repaired if it is to be utilised. |

| Internal decorations |   |
|----------------------|---|
| Repair category:     |    |
| Notes:               | Polystyrene ceiling linings are considered to be a fire hazard and should be removed. |

| Cellars          |  |
|------------------|--|
| Repair category: |  |

| Category 3   | Category 2  | Category 1                               |
|--|---|--|
| Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now. | Repairs or replacement requiring future attention, but estimates are still advised. | No immediate action or repair is needed. |

|        |                 |
|--------|-----------------|
| Notes: | Not applicable. |
|--------|-----------------|

| Electricity      |  |
|------------------|--|
| Repair category: | 1  |
| Notes:           | The electrical installation was tested in April 2017 and although not seen, it has been assumed that a satisfactory Certificate was obtained and this should be verified prior to concluding Missives. Electrical installations should be tested at least every 10 years, or upon a change of ownership. |

| Gas              |                 |
|------------------|-----------------|
| Repair category: |                 |
| Notes:           | Not applicable. |

| Water, plumbing and bathroom fittings |  |
|---------------------------------------|--|
| Repair category:                      | 1  |
| Notes:                                | No visible defects were noted. Seals around the bath/shower areas are frequently troublesome and require regular maintenance. Failure to maintain seals can result in dampness and decay to adjoining and underlying areas. No inspection has been possible to the flooring or the timbers beneath, which are assumed to be in reasonable condition. |

| Heating and hot water |
|-----------------------|
|-----------------------|

| Category 3   | Category 2  | Category 1                               |
|--|---|--|
| Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now. | Repairs or replacement requiring future attention, but estimates are still advised. | No immediate action or repair is needed. |

|                  |  |
|------------------|--|
| Repair category: | 1  |
| Notes:           | It has been assumed that the heating installation is in good working order and this should be verified prior to concluding Missives. |

| Drainage         |  |
|------------------|--|
| Repair category: | 1  |
| Notes:           | <p>No surface indication of any defect noted.</p> <p>As this is a private drainage system, prospective purchasers should satisfy themselves that the system is in good working order prior to making an offer.</p> |

| Category 3   | Category 2  | Category 1                               |
|--|---|--|
| Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now. | Repairs or replacement requiring future attention, but estimates are still advised. | No immediate action or repair is needed. |

| <b>Drainage</b>                              | 1 |

## Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

## Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

### 3. ACCESSIBILITY INFORMATION

#### Guidance Notes on Accessibility Information

**Three steps or fewer to a main entrance door of the property:** In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

**Unrestricted parking within 25 metres:** For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

|  |   |
|--|---|
| 1. Which floor(s) is the living accommodation on?                                      | Ground  |
| 2. Are there three steps or fewer to a main entrance door of the property?             | <input checked="" type="checkbox"/> YES <input type="checkbox"/> NO |
| 3. Is there a lift to the main entrance door of the property?                          | <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO |
| 4. Are all door openings greater than 750mm?   | <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO |
| 5. Is there a toilet on the same level as the living room and kitchen?                 | <input checked="" type="checkbox"/> YES <input type="checkbox"/> NO |
| 6. Is there a toilet on the same level as a bedroom?                                   | <input checked="" type="checkbox"/> YES <input type="checkbox"/> NO |
| 7. Are all rooms on the same level with no internal steps or stairs?                   | <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO |
| 8. Is there unrestricted parking within 25 metres of an entrance door to the building? | <input checked="" type="checkbox"/> YES <input type="checkbox"/> NO |

#### 4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

| <b>Matters for a solicitor or licensed conveyancer</b>  |  |
|---|--|
| <p>I have assumed that Scottish Ownership exists and that there are no onerous conditions or restrictive servitudes contained in the Title.</p> <p>Drainage is to a private drainage system and, in this connection, my valuation assumes that the private drainage arrangements meets with and complies with Statutory Legislation, as outlined by the Scottish Environment Protection Agency. There is now a requirement to register septic tanks with SEPA. It is assumed that the septic tank serving the subjects has been, or in the case of a sale, will be registered as part of the normal conveyancing process.</p> <p>It is assumed that appropriate legal rights exist for the use, maintenance and repair of the private water supply, to include all necessary servitude rights. That the private water supply is adequate in all respects, and that a recent certificate confirming satisfactory testing of the water quality is available. Furthermore, in the event of shared use, that repair/maintenance responsibilities are on an equitable share basis.</p> |  |
| <b>Estimated re-instatement cost (£) for insurance purposes</b>   |  |
| <p>195,000</p> <p>The property should be insured for a sum of no less than One Hundred and Ninety Five Thousand Pounds.</p>   |  |
| <b>Valuation (£) and market comments</b>  |  |
| <p>135,000</p> <p>The current Market Value of the heritable subjects, with the benefit of vacant possession would be fairly stated in a figure of One Hundred and Thirty Five Thousand Pounds.</p> <p>It is recommended that where repairs, defects or maintenance items have been identified interested parties make appropriate enquiries in order to satisfy themselves for potential costs of the extent of the works required prior to submitting a legal offer to purchase.</p> <p>I have assumed that essential repairs will not exceed £10,000.</p>   |  |

# MORTGAGE VALUATION REPORT

---

Includes a market valuation of the property.

## Mortgage Valuation Report

|                     |   |  |
|---------------------|---|--|
| Property:           | Ruthven Cottage<br>Kirkmichael<br>Ballindalloch<br>AB37 9AR | Client: Crown Estate Scotland<br><br>Tenure: Ownership |
| Date of Inspection: | 16/02/2021  | Reference: AFG/DEB/35188                               |

*This report has been prepared as part of your instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising your lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation – Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of the reports contents. Neither the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.*

### 1.0 LOCATION

The property is situated in rural surroundings approximately 3.5 miles from Tomintoul where limited local facilities are available and some 22.5 miles from Aberlour where Secondary Schooling is available. Grantown on Spey is approximately 14 miles distant.

### 2.0 DESCRIPTION

2.1 Age: 65 years.

Detached Bungalow.

### 3.0 CONSTRUCTION

Block cavity walls, rendered externally.  
Pitched, tiled roof.  
Timber and concrete floors.  
uPVC double glazing.

### 4.0 ACCOMMODATION

Entrance Hallway, Lounge, Kitchen, 3 Bedrooms, Bathroom, Porch and Store (no access).

### 5.0 SERVICES (No tests have been applied to any of the services)

|        |         |              |       |      |      |           |             |
|--------|---------|--------------|-------|------|------|-----------|-------------|
| Water: | Private | Electricity: | Mains | Gas: | None | Drainage: | Septic tank |
|--------|---------|--------------|-------|------|------|-----------|-------------|

|                  |                                     |
|------------------|-------------------------------------|
| Central Heating: | Electric storage and panel heaters. |
|------------------|-------------------------------------|

### 6.0 OUTBUILDINGS

|  |  |  |                                  |     |                      |
|--|--|--|----------------------------------|-----|----------------------|
| <b>Garage:</b>   |  | None. Off-street parking is available. |                                  |     |                      |
| <b>Others:</b>   |  | Range of Sheds.                        |                                  |     |                      |
| <b>7.0</b>   | <b>GENERAL CONDITION</b> - <i>A building survey has not been carried out, nor has any inspection been made of any woodwork, services or other parts of the property which were covered, unexposed or inaccessible. The report cannot therefore confirm that such parts of the property are free from defect. Failure to rectify defects, particularly involving water penetration may result in further and more serious defects arising. Where defects exist and where remedial work is necessary, prospective purchasers are advised to seek accurate estimates and costings from appropriate Contractors or Specialists before proceeding with the purchase. Generally we will not test or report on boundary walls, fences, outbuildings, radon gas or site contamination.</i> |  |                                  |     |                      |
| <p>The property is in need of some maintenance, repair and modernisation. Although not an exhaustive list, attention is needed to the following:-</p> <p>(1) Roof coverings.<br/> (2) Chimney stacks and flashings.<br/> (3) Dampness affecting walls and flooring.<br/> (4) Woodworm to roof timbers.</p>   |  |  |                                  |     |                      |
| <b>8.0</b>   | <b>ESSENTIAL REPAIR WORK</b> <i>(as a condition of any mortgage or, to preserve the condition of the property)</i>   |  |                                  |     |                      |
| <p>(1) Roofer/Builder to repair stacks/flashings.<br/> (2) Timber Specialist to investigate and treat damp and woodworm.<br/> (3) The rear chimney flue is considered to be defective and should not be used until it has been checked and declared safe.</p>  |  |  |                                  |     |                      |
| <b>8.1 Retention recommended:</b>  |  | £10,000                                |                                  |     |                      |
| <b>9.0</b>   | <b>ROADS &amp; FOOTPATHS</b>   |  |                                  |     |                      |
| Adopted by the Local Authority.  |  |  |                                  |     |                      |
| <b>10.0</b>  | <b>BUILDINGS INSURANCE (£):</b>  | 195,000                                | <b>GROSS EXTERNAL FLOOR AREA</b> | 100 | <b>Square metres</b> |
|  | <i>This figure is an opinion of an appropriate sum for which the property and substantial outbuildings should be insured against total destruction on a re-instatement basis assuming reconstruction of the property in its existing design and materials. Furnishings and fittings have not been included. No allowance has been included for inflation during the insurance period or during re-construction and no allowance has been made for VAT, other than on professional fees. Further discussions with your insurers is advised.</i>   |  |                                  |     |                      |
| <b>11.0</b>  | <b>GENERAL REMARKS</b>   |  |                                  |     |                      |
| <p>I have assumed that Scottish Ownership exists and that there are no onerous conditions or restrictive servitudes contained in the Title.</p> <p>Drainage is to a private drainage system and, in this connection, my valuation assumes that the private drainage arrangements meets with and complies with Statutory Legislation, as outlined by the Scottish Environment Protection Agency. There is now a requirement to register septic tanks with SEPA. It is assumed that the septic tank serving the subjects has been, or in the case of a sale, will be registered as part of the normal conveyancing process.</p> <p>It is assumed that appropriate legal rights exist for the use, maintenance and repair of the private water supply, to include all necessary servitude rights. That the private water supply is adequate in all respects, and that a recent certificate confirming satisfactory testing of the water quality is available. Furthermore, in the event of shared use, that repair/maintenance responsibilities are on an equitable share basis.</p> <p>It is recommended that where repairs, defects or maintenance items have been identified interested parties make appropriate enquiries in order to satisfy themselves for potential costs of the extent of the works required prior to submitting a legal offer to purchase.</p> |  |  |                                  |     |                      |
| <b>12.0</b>  | <b>VALUATION</b> <i>On the assumption of vacant possession and that the property is unaffected by any adverse planning proposals, onerous burdens, title restrictions or servitude rights. It is assumed that all necessary Local Authority consents, which may have been required, have been sought and obtained. No</i>  |  |                                  |     |                      |

|                                      |   |   |   |
|--------------------------------------|---|---|---|
|                                      | <i>investigation of any contamination on, under or within the property has been made as we consider such matters to be outwith the scope of this report. All property built prior to the year 2000 may contain asbestos in one or more of its components or fittings. It is impossible to identify without a test. It is beyond the scope of this inspection to test for asbestos and future occupants should be advised that if they have any concerns then they should ask for a specialist to undertake appropriate tests.</i> |   |   |

# Energy Performance Certificate (EPC)

# Scotland

Dwellings

RUTHVEN COTTAGE, KIRKMICHAEL, BALLINDALLOCH, AB37 9AR

**Dwelling type:** Detached bungalow  
**Date of assessment:** 16 February 2021  
**Date of certificate:** 19 February 2021  
**Total floor area:** 81 m<sup>2</sup>  
**Primary Energy Indicator:** 879 kWh/m<sup>2</sup>/year

**Reference number:** 9463-1025-5202-9109-3200  
**Type of assessment:** RdSAP, existing dwelling  
**Approved Organisation:** Elmhurst  
**Main heating and fuel:** Electric storage heaters

## You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

|   |        |  |
|---|--------|--|
| Estimated energy costs for your home for 3 years* | £7,737 | See your recommendations report for more information |
| Over 3 years you could save*                      | £3,714 |  |

\* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

Very energy efficient - lower running costs

| Current | Potential |
|---------|-----------|
| 40      | 103       |

## Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band E (40)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Not energy efficient - higher running costs

Very environmentally friendly - lower CO<sub>2</sub> emissions

| Current | Potential |
|---------|-----------|
| 24      | 77        |

## Environmental Impact (CO<sub>2</sub>) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO<sub>2</sub>) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band F (24)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Not environmentally friendly - higher CO<sub>2</sub> emissions

## Top actions you can take to save money and make your home more efficient

| Recommended measures                 | Indicative cost | Typical savings over 3 years |
|--------------------------------------|-----------------|------------------------------|
| 1 Cavity wall insulation             | £500 - £1,500   | £930.00                      |
| 2 Floor insulation (suspended floor) | £800 - £1,200   | £1188.00                     |
| 3 Low energy lighting                | £35             | £135.00                      |

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit [greenerscotland.org](http://greenerscotland.org) or contact Home Energy Scotland on 0808 808 2282.

**THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE**

## Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

| Element               | Description                                    | Energy Efficiency | Environmental |
|-----------------------|--|-------------------|---------------|
| Walls                 | Cavity wall, as built, no insulation (assumed) | ★★☆☆☆             | ★★☆☆☆         |
| Roof                  | Pitched, 250 mm loft insulation                | ★★★★☆             | ★★★★☆         |
| Floor                 | Suspended, no insulation (assumed)             | —                 | —             |
| Windows               | Fully double glazed                            | ★★★★☆             | ★★★★☆         |
| Main heating          | Electric storage heaters                       | ★★★★☆             | ★☆☆☆☆         |
| Main heating controls | Manual charge control                          | ★★☆☆☆             | ★★☆☆☆         |
| Secondary heating     | Room heaters, electric                         | —                 | —             |
| Hot water             | Electric immersion, off-peak                   | ★★☆☆☆             | ★★☆☆☆         |
| Lighting              | Low energy lighting in 13% of fixed outlets    | ★★☆☆☆             | ★★☆☆☆         |

## The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

## The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 149 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 12 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 8.0 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

## Estimated energy costs for this home

|               | Current energy costs | Potential energy costs | Potential future savings  |
|---------------|----------------------|------------------------|---|
| Heating       | £6,564 over 3 years  | £3,432 over 3 years    |  |
| Hot water     | £759 over 3 years    | £372 over 3 years      |   |
| Lighting      | £414 over 3 years    | £219 over 3 years      |   |
| <b>Totals</b> | <b>£7,737</b>        | <b>£4,023</b>          |   |

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

## Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

| Recommended measures  | Indicative cost   | Typical saving per year | Rating after improvement |             |
|---|-------------------|-------------------------|--------------------------|-------------|
|   |                   |                         | Energy                   | Environment |
| 1 Cavity wall insulation  | £500 - £1,500     | £310                    | E 46                     | F 29        |
| 2 Floor insulation (suspended floor)                              | £800 - £1,200     | £396                    | D 55                     | F 38        |
| 3 Low energy lighting for all fixed outlets                       | £35               | £45                     | D 57                     | F 38        |
| 4 High heat retention storage heaters and dual immersion cylinder | £1,600 - £2,400   | £422                    | D 67                     | E 45        |
| 5 Solar water heating   | £4,000 - £6,000   | £64                     | C 69                     | E 49        |
| 6 Solar photovoltaic panels, 2.5 kWp                              | £3,500 - £5,500   | £305                    | C 80                     | D 57        |
| 7 Wind turbine  | £15,000 - £25,000 | £727                    | A 103                    | C 77        |

### Alternative measures

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

- External insulation with cavity wall insulation
- Biomass boiler (Exempted Appliance if in Smoke Control Area)
- Air or ground source heat pump

## Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to [www.greenerscotland.org](http://www.greenerscotland.org).

## About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

### 1 Cavity wall insulation

Cavity wall insulation, to fill the gap between the inner and outer layers of external walls with an insulating material, reduces heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. The insulation material is pumped into the gap through small holes that are drilled into the outer walls, and the holes are made good afterwards. As specialist machinery is used to fill the cavity, a professional installation company should carry out this work, and they should carry out a thorough survey before commencing work to ensure that this type of insulation is suitable for this home and its exposure. They should also provide a guarantee for the work and handle any building standards issues. Further information about cavity wall insulation and details of local installers can be obtained from the National Insulation Association ([www.nationalinsulationassociation.org.uk](http://www.nationalinsulationassociation.org.uk)).

### 2 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including [www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation](http://www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation). Building regulations generally apply to this work so it is best to check with your local authority building standards department.

### 3 Low energy lighting

Replacement of traditional light bulbs with energy saving bulbs will reduce lighting costs over the lifetime of the bulb, and they last many times longer than ordinary light bulbs. Low energy lamps and fittings are now commonplace and readily available. Information on energy efficiency lighting can be found from a wide range of organisations, including the Energy Saving Trust (<http://www.energysavingtrust.org.uk/home-energy-efficiency/lighting>).

### 4 High heat retention storage heaters

Modern storage heaters have better insulation and are easier to control than the older type in this property. Ask for a quotation for new, high heat retention heaters with automatic charge and output controls. A dual-immersion cylinder, which can be installed at the same time, will provide cheaper hot water than the system currently installed. Installations should be in accordance with the current regulations covering electrical wiring. Ask the heating engineer to explain the options, which might also include switching to other forms of electric heating.

### 5 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at [www.microgenerationcertification.org](http://www.microgenerationcertification.org).

### 6 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at [www.microgenerationcertification.org](http://www.microgenerationcertification.org).

## 7 Wind turbine

A wind turbine provides electricity from wind energy. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Wind turbines are not suitable for all properties. The system's effectiveness depends on local wind speeds and the presence of nearby obstructions, and a site survey should be undertaken by an accredited installer. Planning permission might be required and building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for a wind turbine, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at [www.microgenerationcertification.org](http://www.microgenerationcertification.org).

## Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

**LZC energy sources present:** There are none provided for this home

## Your home's heat demand

You could receive Renewable Heat Incentive (RHI) payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat and, where appropriate, having your loft insulated and cavity walls filled. The estimated energy required for space and water heating will form the basis of the payments. For more information go to [www.energysavingtrust.org.uk/scotland/rhi](http://www.energysavingtrust.org.uk/scotland/rhi).

| Heat demand                  | Existing dwelling | Impact of loft insulation | Impact of cavity wall insulation | Impact of solid wall insulation |
|------------------------------|-------------------|---------------------------|----------------------------------|---------------------------------|
| Space heating (kWh per year) | 20,344            | N/A                       | (2,886)                          | N/A                             |
| Water heating (kWh per year) | 2,117             |                           |                                  |                                 |

## Addendum

This dwelling may be exposed to wind driven rain and so requires further investigation to determine which type of cavity wall insulation is best suited.

## About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst ([www.elmhurstenergy.co.uk](http://www.elmhurstenergy.co.uk)), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk) and entering the report reference number (RRN) printed at the top of this page.

|                             |  |
|-----------------------------|--|
| Assessor's name:            | Mr. Angus Gunn   |
| Assessor membership number: | EES/008267   |
| Company name/trading name:  | Allied Surveyors Scotland Plc  |
| Address:                    | 209 High Street<br>Elgin<br>IV30 1DJ                                     |
| Phone number:               | 01343 547481   |

| Related party disclosure:   | No related party   |

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

## Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at [www.scottishepcregister.org.uk](http://www.scottishepcregister.org.uk), with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at [www.gov.scot/epc](http://www.gov.scot/epc).

### **Advice and support to improve this property**

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit [greener-scotland.org](https://www.greener-scotland.org) or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.
