Important Notice:

This report has been prepared for the purposes of and use of Malcolm Smith. Should your name not be on this report then Onesurvey is unable to guarantee that this is a genuine or complete copy of the Home Report. A personalised copy of this Home Report may be obtained at www.onesurvey.org free of charge.

If you are a potential purchaser of this property you may then present your personalised copy of the report to your advisers or mortgage provider with a view to them requesting a transcription report from the appointed Chartered Surveyor.

Neither the whole, nor any part of this report may be included in any published document, circular or statement, nor published in any way without the consent of Onesurvey Ltd. Only the appointed Chartered Surveyor can utilise the information contained herein for the purposes of providing a transcription report for mortgage/loan purposes

PART 1

SINGLE SURVEY

A report on the condition of the property, with categories being rated from 1 to 3.

Single Survey

Survey report on:

Customer	Mr & Mrs. Malcolm Smith	
Customer address	Craigie Tytler Street Forres IV36 1EL	
Date of Inspection	14/07/2017	
Prepared by	Angus F Gunn BSc MRICS, BSc (Hons) MRICS Allied Surveyors Scotland Plc	

PART 1 - GENERAL

1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who is competent to survey, value and report upon Residential Property. ¹

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by ticking the adjacent box.

 \square

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

¹ Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

To date, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to

- the Seller;
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report. 2

1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for

expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- a "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and

² Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

PART 2 - DESCRIPTION OF THE REPORT

2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, *visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.*

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not

significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1 <u>Category 3</u>: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2 <u>Category 2</u>: Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an

arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- *There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- ➤ *There are no particularly troublesome or unusual legal restrictions;
- *There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property

1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The subjects comprise of a traditional Semi-detached Dwellinghouse with single storey rear projection and outbuildings.	
Accommodation	The ground floor accommodation comprises of an Entrance Vestibule, Hallway, Sittingroom, Diningroom, Pantry Store/Office, Dining/Kitchen, Rear Hallway, Utility Room and a Cloakroom. The first floor accommodation comprises of a Landing, Bathroom and 4 Bedrooms.	
Gross internal floor area (m2)	Approx 152 m2 (excluding Outbuildings).	
Neighbourhood and location	The subjects are situated in an established residential area of Forres. Amenities and services are close by.	
Age	The property is aged over 100 years.	
Weather	The weather was sunny and dry at the time of our inspection. The report should be read in context of these weather conditions.	
Chimney stacks	There are 2 stone chimney stacks pertaining to the property, one of which is mutual with the neighbouring property. The chimney stacks are located at gable apexes and have lead flashings at the base. Visually inspected with the aid of binoculars where required.	
Roofing including roof	The roof is of a pitched design incorporating dormer window	

space	projections. The roof coverings are of traditional slates. The roofs over the dormer windows are pitched and slated. The roof above the single storey projection is pitched and slated. Ridging and valleys are formed in lead. The roof above the bay window within the Diningroom is pitched and clad with slates. Flashings are formed in lead. The roofing above the Sittingroom window projection is flat and covered with lead. The roof space above the 2 storey part of the House was accessed via a ceiling hatch within the Bathroom. A very limited visual inspection was made of the roof space from a ladder at a level below the hatch. Approximately 100 mm of insulation appears to have been laid at joist level. The roof is of timber construction with timber sarking. There is a single glazed roof light within the roof pitch. The roof space above the single storey projection to the rear of the house was not inspected. Sloping roofs were visually inspected with the aid of binoculars where required. Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally. Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.	
Rainwater fittings	Rainwater fittings are of a traditional cast iron manufacture including decorative hopper heads.	
	Visually inspected with the aid of binoculars where required.	
Main walls	The main walls are of a solid sandstone construction with decorative sandstone features. There was evidence of subfloor ventilation grilles.	
	Visually inspected with the aid of binoculars where required.	
	Foundations and concealed parts were not exposed or inspected.	
Windows, external doors and joinery	Windows and doors are of a replacement PVC double glazed manufacture. There appears to be single glazed skylight window in the roof space. The front door is of a double door design formed in PVC with double glazing. The rear door is of a PVC and double glazed manufacture. Internal and external doors were opened and closed where keys were available.	
	Random windows were opened and closed where possible.	
	Nandom windows were opened and closed where possible.	

	Doors and windows were not forced open.	
External decorations	There are ornate stonework decorations to the walls. Cast iron goods are painted.	
	Visually inspected.	
Conservatories / porches	None.	
Communal areas	None.	
Garages and permanent outbuildings	There is no Garage. There is a driveway with room for a Garage. There is an attached stone built Outbuilding with a pitched, slated roof with cast iron rainwater goods.	
	There is a timber and felted Garden Shed. There is a timber glazed and felted Summerhouse located at the bottom of the garden. Visually inspected.	
Outside areas and boundaries	Boundaries are defined by masonry walls. Access gates are formed in metal. The front garden is laid with flower beds, paving and stone chippings. The rear garden is spacious and is laid with raised timber decking seating area to the rear of the garden, paving and flower beds.	
	Visually inspected.	
Ceilings	Ceilings are formed in mixed lath and plaster or plasterboard linings.	
	Visually inspected from floor level.	
Internal walls	Internal walls are formed in plasterboard, plaster on the hard or lath and plaster. Visually inspected from floor level.	
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.	
Floors including sub floors	Floors are solid or of a suspended timber construction. A visually limited inspection of part of the sub-floor area was inspected from the floor hatch within the Pantry. Access to floor surfaces or sub-floors within the rest of the House was not made due to fitted floor coverings and fixtures and no other readily accessible hatches.	
	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted.	
Internal joinery and kitchen fittings	The majority of internal joinery finishes within the property are of a traditional hardwood type. Some of the internal	

-		
	doors have inset glazing. The Kitchen fittings comprise of floor and base fitted units with a stainless steel sink unit, gas range cooker and extraction hood. There are more units located within the Utility Room with laminated worktops and a stainless steel sink unit. Built-in cupboards were looked into but no stored items were moved.	
	Kitchen units were visually inspected excluding appliances.	
Chimney breasts and fireplaces	There are 2 gas fires fitted within the property. It is likely that a fireplace originally in the Bedroom may have been boarded over at some time in the past.	
	Visually inspected. No testing of the flues or fittings was carried out.	
Internal decorations	Walls and ceilings have been wooden clad, wood-chipped, papered, painted or tiled throughout. Floors have been carpeted, tiled or laminated throughout. Visually inspected.	
Cellars	None.	
Electricity	Electricity is provided from the mains supply via the fuseboard located within the cupboard in the Sittingroom. The electricity meter is also located within the cupboard within the Sittingroom. Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the	
	system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.	
Gas	Gas is provided from the mains supply and serves the boiler, gas range cooker and the gas fires. The gas meter box is externally located.	
	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the Surveyor will state that in the report and will not turn them on.	
Water, plumbing and bathroom fittings	Water is provided from the mains public supply. The plumbing installation of PVC and copper pipework were seen.	
	The sanitaryware within the Bathroom comprises of a bath with overhead electric shower, wash hand basin and a lavatory. The sanitaryware in the Cloakroom comprises a lavatory.	
	Visual inspection of the accessible pipework, water tanks, cylinders and fittings without removing any insulation.	

	No tests whatsoever were carried out to the system or appliances.	
Heating and hot water	There is a gas fired boiler which supplies hot water and heat to radiators throughout the property. Although not seen, we are in understanding that there is a hot water cylinder/immersion heater which supplements the hot water supply if required. Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.	
	No tests whatsoever were carried out to the system or appliances.	
Drainage	Drainage is from the mains public sewer.	
	Drainage covers etc were not lifted.	
	Neither drains nor drainage systems were tested.	
Fire, smoke and burglar alarms	There is a burglar alarm. We are in understanding that a hard-wired smoke detector is fitted.	
	Visually inspected.	
	No tests whatsoever were carried out to the system or appliances.	
Any additional limits to inspection	We have not inspected the woodwork or other parts of the structure which were covered, unexposed or inaccessible and are, therefore, unable to report that such parts of the property are free from rot, beetle or other such defects. No investigation of any contamination on, under or within the property has been made as we consider such matters to be outwith the scope of this report. All property built prior to the year 2000 may contain asbestos in one or more of its components or fittings. It is impossible to identify without a test. It is beyond the scope of this inspection to test for asbestos and future occupants should be advised that if they have any concerns, then they should ask for a specialist to undertake appropriate tests. Asbestos is not harmful unless fibres are released into the air. Random testing for dampness was undertaken internally with the use of a moisture meter to walls, ceilings and flooring where considered appropriate. The services, electrical circuits, plumbing installation, heating and drainage systems have not been specifically tested.	
	We do not carry out an inspection for Japanese Knotweed, which is a plant which is subject to control regulation, is	

considered to be invasive and one which can render a property unsuitable for some mortgage lenders. We have assumed that there is no Japanese Knotweed within the boundaries of the property or in neighbouring properties. Identification of Japanese Knotweed is best undertaken by a specialist contractor. If it exists, removal must be undertaken in a controlled manner by specialist contractors. This can prove to be expensive.

Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the following 3 categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement		
Repair category:	1	
Notes:	There is no evidence of any significant structural movement affecting the property.	

Dampness, rot and infestation		
Repair category:		
Notes:	Readings taken within the property, where appropriate, with an electronic protimeter, were found to be within tolerable standards and no evidence of any significant dampness was recorded. Signs of wood boring insect infestation. However, there is a woodworm treatment certificate dated 1985. We are in understanding that damp prevention treatment works to timbers and the sub-floor area were carried out in 1985 per a Guarantee Certificate seen.	

Chimney stacks	
Repair category:	2
Notes:	There are signs of weathering to the coping stones on the chimney stacks.

Roofing including roof space

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Repair category:	2
Notes:	We noted weathered and chipped roof slates. There is a flat lead roof above the window projection in the Sittingroom. Although there was no indication of any rain seepage from a visual inspection, experience shows that leaks can manifest themselves unpredictably and without warning.

Rainwater fittings	
Repair category:	1
Notes:	No significant defects were noted.

Main walls	
Repair category:	
Notes:	Erosion was noted to the stonework.

Windows, external doors and joinery	
Repair category:	1
Notes:	No significant defects were noted.
	Replacement/double glazed windows can be problematic and over time the operation of the windows can be affected and opening mechanisms damaged. It is therefore likely that maintenance repairs will be required as part of an on-going maintenance programme. Our valuation does assume that the installation of the windows does comply with the necessary regulations at the time of

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

olicable.	
Garages and permanent outbuildings	
st iron guttering to the stone Outbuilding is misaligned.	

Outside areas and boundaries

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Repair category:	1
Notes:	No significant defects were noted.

Ceilings	
Repair category:	
Notes:	No visual defects were noted.

Internal walls	
Repair category:	1
Notes:	No visual defects were noted.

Floors including sub-floors	
Repair category:	1
Notes:	From what was seen, no visual defects were noted. We are in understanding that damp prevention works were carried out to timbers of the sub-floor areas in 1985.

Internal joinery and kitchen fittings	
Repair category:	
	No significant defects were noted.

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

Notes:	

Chimney breasts and fireplaces		
Repair category:		
Notes:	No significant defects were noted. The gas fires were not in operation at the time of our inspection. We advise that any redundant flues to be vented and capped, if not in use.	

Internal decorations		
Repair category:	1	
Notes:	No visual defects were noted. The internal décor was in a good order throughout.	

Cellars		
Repair category:		
Notes:	Not applicable.	

Electricity		
Repair category:	2	
Notes:	We noted mixed vintage electrical equipment. We have not had sight of a recent Electrical Test Certificate carried out within the last 10 years.	

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	Repairs or replacement requiring future attention, but estimates are still advised.	No immediate action or repair is needed.

We have been advised by the current Occupier that the House was rewired by a qualified Electrician in 1993.

The Institution of Engineering and Technology recommends that inspection and testings are undertaken, at least, every 10 years and on a change of occupancy. It should be appreciated that only the most recently constructed or rewired properties will have installations which fully comply with present IET Regulations.

Gas	
Repair category:	
Notes:	No visual defects were noted.

Water, plumbing and bathroom fittings	
Repair category:	
Notes:	No visual defects were noted.

Heating and hot water	
Repair category:	1
Notes:	No visual defects were noted.
The hot water cylinder was not seen.

Conservatories / porches	
Communal areas	
Garages and permanent outbuildings	1
Outside areas and boundaries	1
Ceilings	1
Internal walls	1
Floors including sub-floors	1
Internal joinery and kitchen fittings	1
Chimney breasts and fireplaces	1
Internal decorations	1
Cellars	
Electricity	2
Gas	1
Water, plumbing and bathroom fittings	1
Heating and hot water	1
Drainage	1

Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

3. ACCESSIBILITY INFORMATION

Guidance Notes on Accessibility Information

Three steps or fewer to a main entrance door of the property: In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

<u>Unrestricted parking within 25 metres:</u> For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coinoperated machines.

1. Which floor(s) is the living accommodation on?	Ground & First
2. Are there three steps or fewer to a main entrance door of the property?	[x]YES []NO
3. Is there a lift to the main entrance door of the property?	[]YES [x]NO
4. Are all door openings greater than 750mm?	[]YES [x]NO
5. Is there a toilet on the same level as the living room and kitchen?	[x]YES []NO
6. Is there a toilet on the same level as a bedroom?	[x]YES []NO
7. Are all rooms on the same level with no internal steps or stairs?	[]YES [x]NO
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	[x]YES []NO

4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

Matters for a solicitor or licensed conveyancer

I have assumed that Scottish Ownership exists and that there are no onerous conditions or restrictive servitudes contained in the Title.

Replacement windows and doors have been fitted at some point in the past.

The subjects are situated in an area of Forres which was affected by flooding in the past. Flood alleviation works have recently been completed and it is assumed that insurance for the property can be obtained on normal terms.

There are Warranty Certificates dated 1985 for the treatment of wood boring insect infestation and damp prevention works including the retro-fit of a damp course system.

Estimated re-instatement cost (£) for insurance purposes

400,000

The property should be insured for a sum of no less than Four Hundred Thousand Pounds.

Valuation (£) and market comments

220,000

The current Market Value of the heritable subjects, with the benefit of vacant possession would be fairly stated in a figure of Two Hundred and Twenty Thousand Pounds.

MORTGAGE VALUATION **REPORT**

Includes a market valuation of the property.

Property: Craigie Tytler Street Forres IV36 1EL Date of Inspection: Tytler Street Reference: CB/DEB/32016 Mortgage Valuation Report Client: Mr & Mrs. Malcolm Smith Tenure: Ownership Client: Mr & Mrs. Malcolm Smith General Smith Tenure: Ownership

This report has been prepared as part of your instructions to carry out a Single Survey on the property referred to above. The purpose of this report is to summarise the Single Survey for the purpose of advising your lender on the suitability of the property for mortgage purposes. The decision as to whether mortgage finance will be provided is entirely a matter for the lender. You should not rely on this report in making your decision to purchase but consider all the documents provided in the Home Report. Your attention is drawn to the additional comments elsewhere within the report which set out the extent and limitations of the service provided. This report should be read in conjunction with the Single Survey Terms and Conditions (with MVR). In accordance with RICS Valuation – Global Standards 2017 this report is for the use of the party to whom it is addressed or their named client or their nominated lender. No responsibility is accepted to any third party for the whole or any part of the reports contents. Neither the whole or any part of this report may be included in any document, circular or statement without prior approval in writing from the surveyor.

1.0 LOCATION

The subjects are situated in an established residential area of Forres. Amenities and services are close by.

2.0 DESCRIPTION 2.1 Age: Over 100 years.

The subjects comprise of a traditional Semi-detached Dwellinghouse with single storey rear projection and Outbuildings.

3.0 CONSTRUCTION

Walls are of solid stone construction, pointed externally.

The roofs are of pitched design and clad with traditional slates. The roof above the Sittingroom window projection is flat and formed in lead.

The floors are of solid and suspended timber construction.

The windows are of a PVC double glazed manufacture.

4.0 ACCOMMODATION

The ground floor accommodation comprises of an Entrance Vestibule, Hallway, Sittingroom, Diningroom, Pantry Store/Office, Dining/Kitchen, Rear Hallway, Utility Room and a Cloakroom.

The first floor accommodation comprises of a Landing, Bathroom and 4 Bedrooms.

5.0	SERVICES (No tests have been applied to any of the services)						
Water:	Mains	Mains Electricity: Mains Gas: Mains Drainage: Mains					

Central Heat	ing:	Gas wet system to radiators.				
6.0	OUTBUILDIN	GS				
Garage:		Off street parking only.				
Others:		Stone Outbuilding. Timber and felted Outbuildings.				
GENERAL CONDITION - A building survey has not been carried out, nor has any inspection been made of any woodwork, services or other parts of the property which were covered, unexposed or inaccessible The report cannot therefore confirm that such parts of the property are free from defect. Failure to rectify defects, particularly involving water penetration may result in further and more serious defects arising. Where defects exist and where remedial work is necessary, prospective purchasers are advised to seek accurate estimates and costings from appropriate Contractors or Specialists before proceeding with the purchase. Generally we will not test or report on boundary walls, fences, outbuildings, radon gas or site contamination.

VALUATION On the assumption of vacant possession and that the property is unaffected by any adverse planning proposals, onerous burdens, title restrictions or servitude rights. It is assumed that all necessary Local Authority consents, which may have been required, have been sought and obtained. No investigation of any contamination on, under or within the property has been made as we consider such matters to be outwith the scope of this report. All property built prior to the year 2000 may contain asbestos in one or more of its components or fittings. It is impossible to identify without a test. It is beyond the scope of this inspection to test for asbestos and future occupants should be advised that if they have any concerns then they should ask for a specialist to undertake appropriate tests.

PART 3.

ENERGY REPORT

A report on the energy efficiency of the property.

energy report

energy report on:

Property address	Craigie Tytler Street Forres IV36 1EL
Customer	Mr & Mrs. Malcolm Smith
Customer address	Craigie Tytler Street Forres IV36 1EL
Prepared by	Angus F Gunn BSc MRICS, BSc (Hons) MRICS Allied Surveyors Scotland Plc

Energy Performance Certificate (EPC)

Dwellings

Scotland

CRAIGIE, TYTLER STREET, FORRES, IV36 1EL

Dwelling type: Semi-detached house

Date of assessment:14 July 2017Date of certificate:21 July 2017Total floor area:152 m²

Primary Energy Indicator: 306 kWh/m²/year

Reference number: 8413-0223-9100-0554-4996 **Type of assessment:** RdSAP, existing dwelling

Approved Organisation: Elmhurst

Main heating and fuel: Boiler and radiators, mains

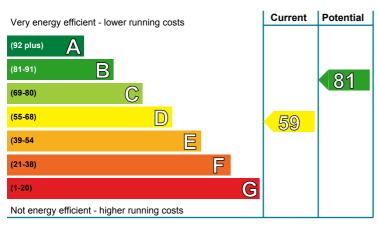

gas

You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO₂ emissions by improving your home

Estimated energy costs for your home for 3 years*	£5,052	See your recommendations
Over 3 years you could save*	£2,037	report for more information

^{*} based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

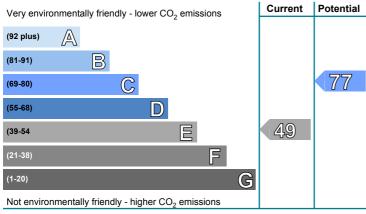

Energy Efficiency Rating

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (59)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Environmental Impact (CO₂) Rating

This graph shows the effect of your home on the environment in terms of carbon dioxide (CO_2) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band E (49)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years	Available with Green Deal
1 Increase loft insulation to 270 mm	£100 - £350	£129.00	②
2 Internal or external wall insulation	£4,000 - £14,000	£1215.00	Ø
3 Floor insulation (suspended floor)	£800 - £1,200	£219.00	Ø

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

The Green Deal may allow you to make your home warmer and cheaper to run at no up-front capital cost. See your recommendations report for more details.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	Sandstone or limestone, as built, no insulation (assumed)	***	***
Roof	Pitched, 100 mm loft insulation	***	***
Floor	Suspended, no insulation (assumed) Solid, no insulation (assumed)	_ _	_ _
Windows	Fully double glazed	****	****
Main heating	Boiler and radiators, mains gas	****	****
Main heating controls	Programmer, room thermostat and TRVs	****	****
Secondary heating	Room heaters, mains gas	_	_
Hot water	From main system, no cylinder thermostat	***	***
Lighting	Low energy lighting in all fixed outlets	****	****

The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO₂ emissions, running costs and the savings possible from making improvements.

The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 54 kg CO₂/m²/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 8.2 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 4.5 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£3,993 over 3 years	£2,508 over 3 years	
Hot water	£813 over 3 years	£261 over 3 years	You could
Lighting	£246 over 3 years	£246 over 3 years	save £2,037
Totals	£5,052	£3,015	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

Recommendations for improvement

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		Indicative cost	Typical saving	Rating after improvement		Green
			per year	Energy	Environment	Deal
1	Increase loft insulation to 270 mm	£100 - £350	£43	D 59	E 50	
2	Internal or external wall insulation	£4,000 - £14,000	£405	C 69	D 62	
3	Floor insulation (suspended floor)	£800 - £1,200	£73	C 71	D 65	
4	Solar water heating	£4,000 - £6,000	£159	C 75	C 71	
5	Solar photovoltaic panels, 2.5 kWp	£5,000 - £8,000	£258	B 81	C 77	

Measures which have a green deal tick of are likely to be eligible for Green Deal finance plans based on indicative costs. Subsidy also may be available for some measures, such as solid wall insulation. Additional support may also be available for certain households in receipt of means tested benefits. Measures which have an orange tick may need additional finance. To find out how you could use Green Deal finance to improve your property, visit www.greenerscotland.org or contact the Home Energy Scotland hotline on 0808 808 2282.

Choosing the right improvement package

Page 35 Page 2 of 5

About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

1 Loft insulation

Loft insulation laid in the loft space or between roof rafters to a depth of at least 270 mm will significantly reduce heat loss through the roof; this will improve levels of comfort, reduce energy use and lower fuel bills. Insulation should not be placed below any cold water storage tank, any such tank should also be insulated on its sides and top, and there should be boarding on battens over the insulation to provide safe access between the loft hatch and the cold water tank. The insulation can be installed by professional contractors but also by a capable DIY enthusiast. Loose granules may be used instead of insulation quilt; this form of loft insulation can be blown into place and can be useful where access is difficult. The loft space must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about loft insulation and details of local contractors can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk).

2 Internal or external wall insulation

Internal or external wall insulation involves adding a layer of insulation to either the inside or the outside surface of the external walls, which reduces heat loss and lowers fuel bills. As it is more expensive than cavity wall insulation it is only recommended for walls without a cavity, or where for technical reasons a cavity cannot be filled. Internal insulation, known as dry-lining, is where a layer of insulation is fixed to the inside surface of external walls; this type of insulation is best applied when rooms require redecorating. External solid wall insulation is the application of an insulant and a weather-protective finish to the outside of the wall. This may improve the look of the home, particularly where existing brickwork or rendering is poor, and will provide long-lasting weather protection. Further information can be obtained from the National Insulation Association (www.nationalinsulationassociation.org.uk). It should be noted that planning permission might be required and that building regulations apply to this work so it is best to check with your local authority whether a building warrant or planning permission will be required.

3 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check this with your local authority building standards department.

4 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

5 Solar photovoltaic (PV) panels

A solar PV system is one which converts light directly into electricity via panels placed on the roof with no waste and no emissions. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for solar photovoltaic panels, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

LZC energy sources present: There are none provided for this home

Page 36 Page 3 of 5

Your home's heat demand

You could receive Renewable Heat Incentive (RHI) payments and help reduce carbon emissions by replacing your existing heating system with one that generates renewable heat and, where appropriate, having your loft insulated and cavity walls filled. The estimated energy required for space and water heating will form the basis of the payments. For more information go to www.energysavingtrust.org.uk/scotland/rhi.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	22,777	(927)	N/A	(7,644)
Water heating (kWh per year)	5,347			

Addendum

This dwelling has stone walls and so requires further investigation to establish whether these walls are of cavity construction and to determine which type of wall insulation is best suited.

About this document

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Mrs. Gemma Bailey Assessor membership number: EES/021063

Company name/trading name: Allied Surveyors Scotland Plc

Address: Lyle House, Pavilion 1 Fairways Business Park

Inverseshire

Invernesshire Inverness IV2 6AA 01343 547 482

Phone number: 01343 547 482
Email address: gcjb10@hotmail.com
Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

Page 37 Page 4 of 5

Opportunity to benefit from a Green Deal on this property

Under a Green Deal, the cost of the improvements is repaid over time via a credit agreement. Repayments are made through a charge added to the electricity bill for the property.

To see which improvements are recommended for this property, please turn to page 3. You can choose which improvements you want to install and ask for a quote from an authorised Green Deal provider. They will organise installation by an authorised Green Deal installer. If you move home, the responsibility for paying the Green Deal charge under the credit agreement passes to the new electricity bill payer.

For householders in receipt of income-related benefits, additional help may be available.

To find out more, visit www.greenerscotland.org or call 0808 808 2282.

Authorised home energy assessment

Finance at no upfront cost

Choose from authorised installers May be paid from savings in energy bills

Repayments stay with the electricity bill payer

PROPERTY QUESTIONNAIRE

The owner of the property is required to complete this document which asks for information on the property such as 'Which council tax band?' etc.

Property Questionnaire

Property Address	Craigie Tytler Street Forres IV36 1EL
Seller(s)	Malcolm Smith
Completion date of property questionnaire	09/07/2017

Note for sellers

1.	Length of ownership		
	How long have you owned the proper 32 years	ty?	
2.	Council tax		
	Which Council Tax band is your prop	erty in? (Please circle)	
3.	Parking		
	What are the arrangements for parking at your property? (Please tick all that apply)		
	Garage	[]	
	Allocated parking space		
	Driveway	[x]	
	Shared parking	[]	
	On street		
	Resident permit	[]	
	Metered parking	[]	
	Other (please specify):		

4.	Conservation area		
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or appearance of which it is desirable to preserve or enhance)?	[]YES [x]NO []Don't know	
5.	Listed buildings		
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	[]YES [x]NO	
6.	Alterations/additions/extensions		
а	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	[]YES [x]NO	
	If you have answered yes, please describe below the changes which you have made:		
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work?	[]YES[]NO	
	If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking.		
	If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:		
b	Have you had replacement windows, doors, patio doors or double glazing installed in your property	[x]YES []NO	
	If you have answered yes, please answer the three questions below:		
	(i) Were the replacements the same shape and type as the ones you replaced?	[x]YES []NO	
	(ii) Did this work involve any changes to the window or door openings?	[]YES [x]NO	
	(iii) Please describe the changes made to the windows doors, or patio doors (with approximate dates when the work was completed):		
	Fitted double glazing upstairs in 2000 and downstairs in 2001.		
	Please give any guarantees which you received for this work to your solicitor or estate agent.		

7.	Central heating	
а	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property - the main living room, the bedroom(s), the hall and the bathroom).	[x]YES []NO []Partial
	If you have answered yes or partial - what kind of central heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air). Gas fired	
	If you have answered yes, please answer the three questions below:	
	(i) When was your central heating system or partial central heating system installed? 1986. Boiler replaced in 2013	
	(ii) Do you have a maintenance contract for the central heating system?	[]YES [x]NO
	If you have answered yes, please give details of the company with which you have a maintenance contract	
	(iii) When was your maintenance agreement last renewed? (Please provide the month and year).	
8.	Energy Performance Certificate	
	Does your property have an Energy Performance Certificate which is less than 10 years old?	[x]YES []NO
9.	Issues that may have affected your property	
а	Has there been any storm, flood, fire or other structural damage to your property while you have owned it?	[x]YES []NO
	If you have answered yes, is the damage the subject of any outstanding insurance claim?	[]YES [x]NO
b	Are you aware of the existence of asbestos in your property?	[]YES [x]NO
	If you have answered yes, please give details:	
10.	Services
